

DASH DIGITAL

DRONEWORK

DASH

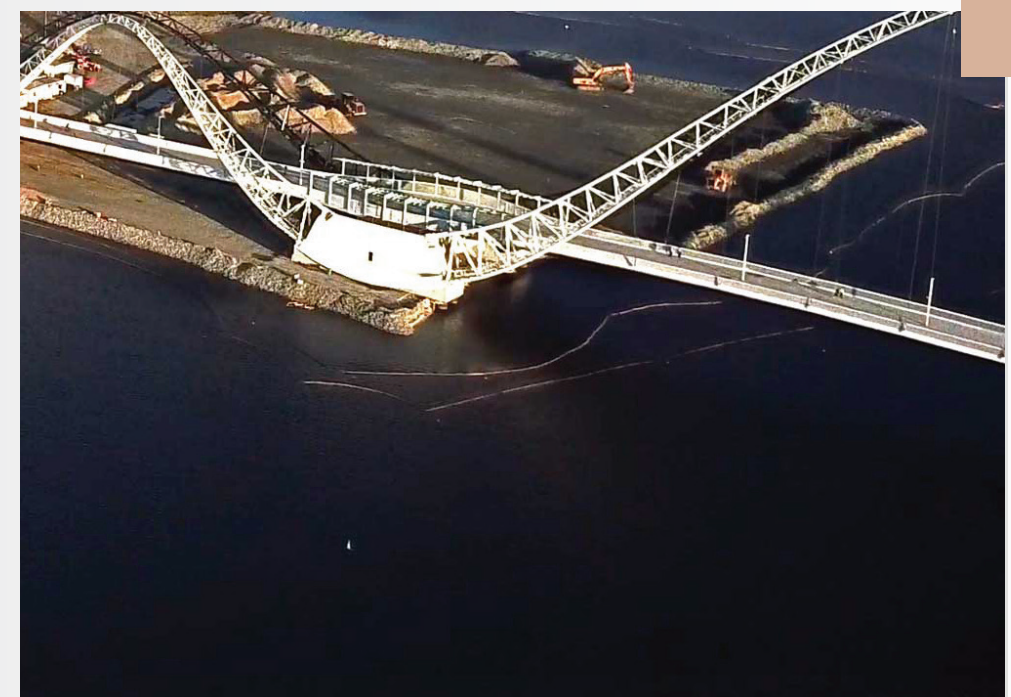

01. Introduction

We specialise in high-quality aerial footage using the latest drone technology, including the DJI Mavic Pro and DJI Mavic Mini. The DJI Mavic Pro features a 12MP camera with 4K video capabilities, offering sharp, detailed imagery and smooth, cinematic footage

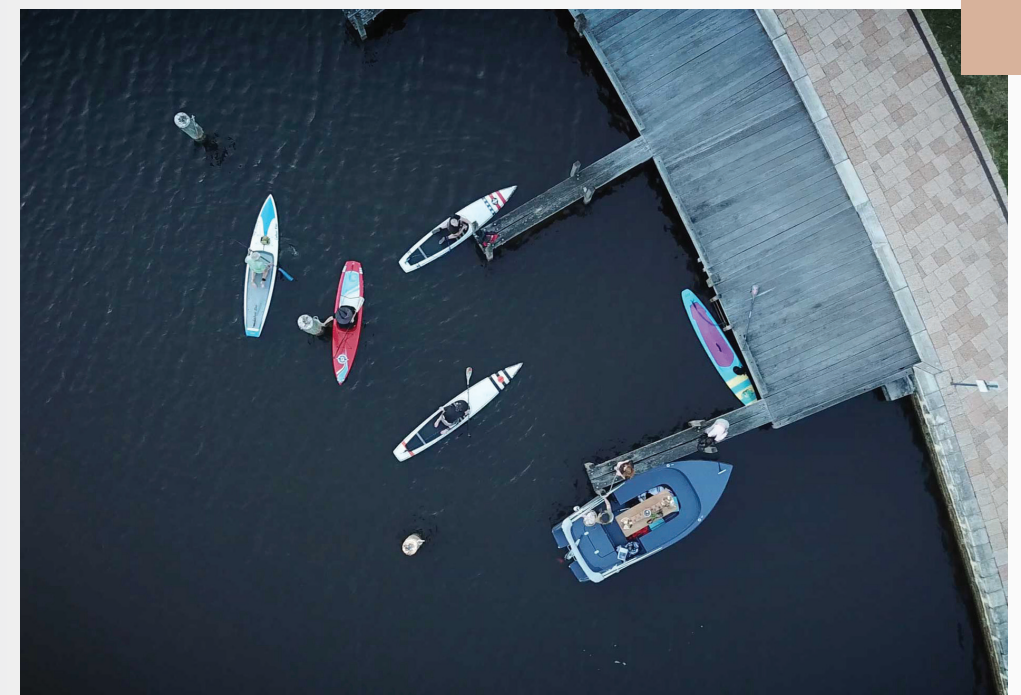

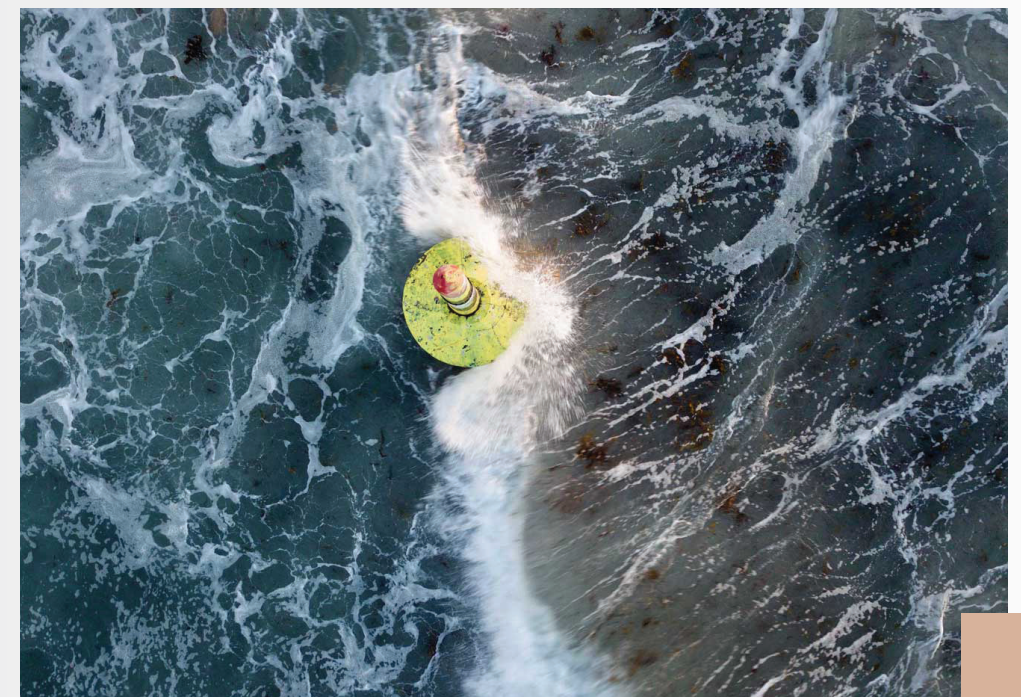

thanks to its advanced 3-axis gimbal. For more compact or hard-to-reach locations, the DJI Mavic Mini delivers impressive 2.7K video and 12MP photos, all while being lightweight and easy to deploy.

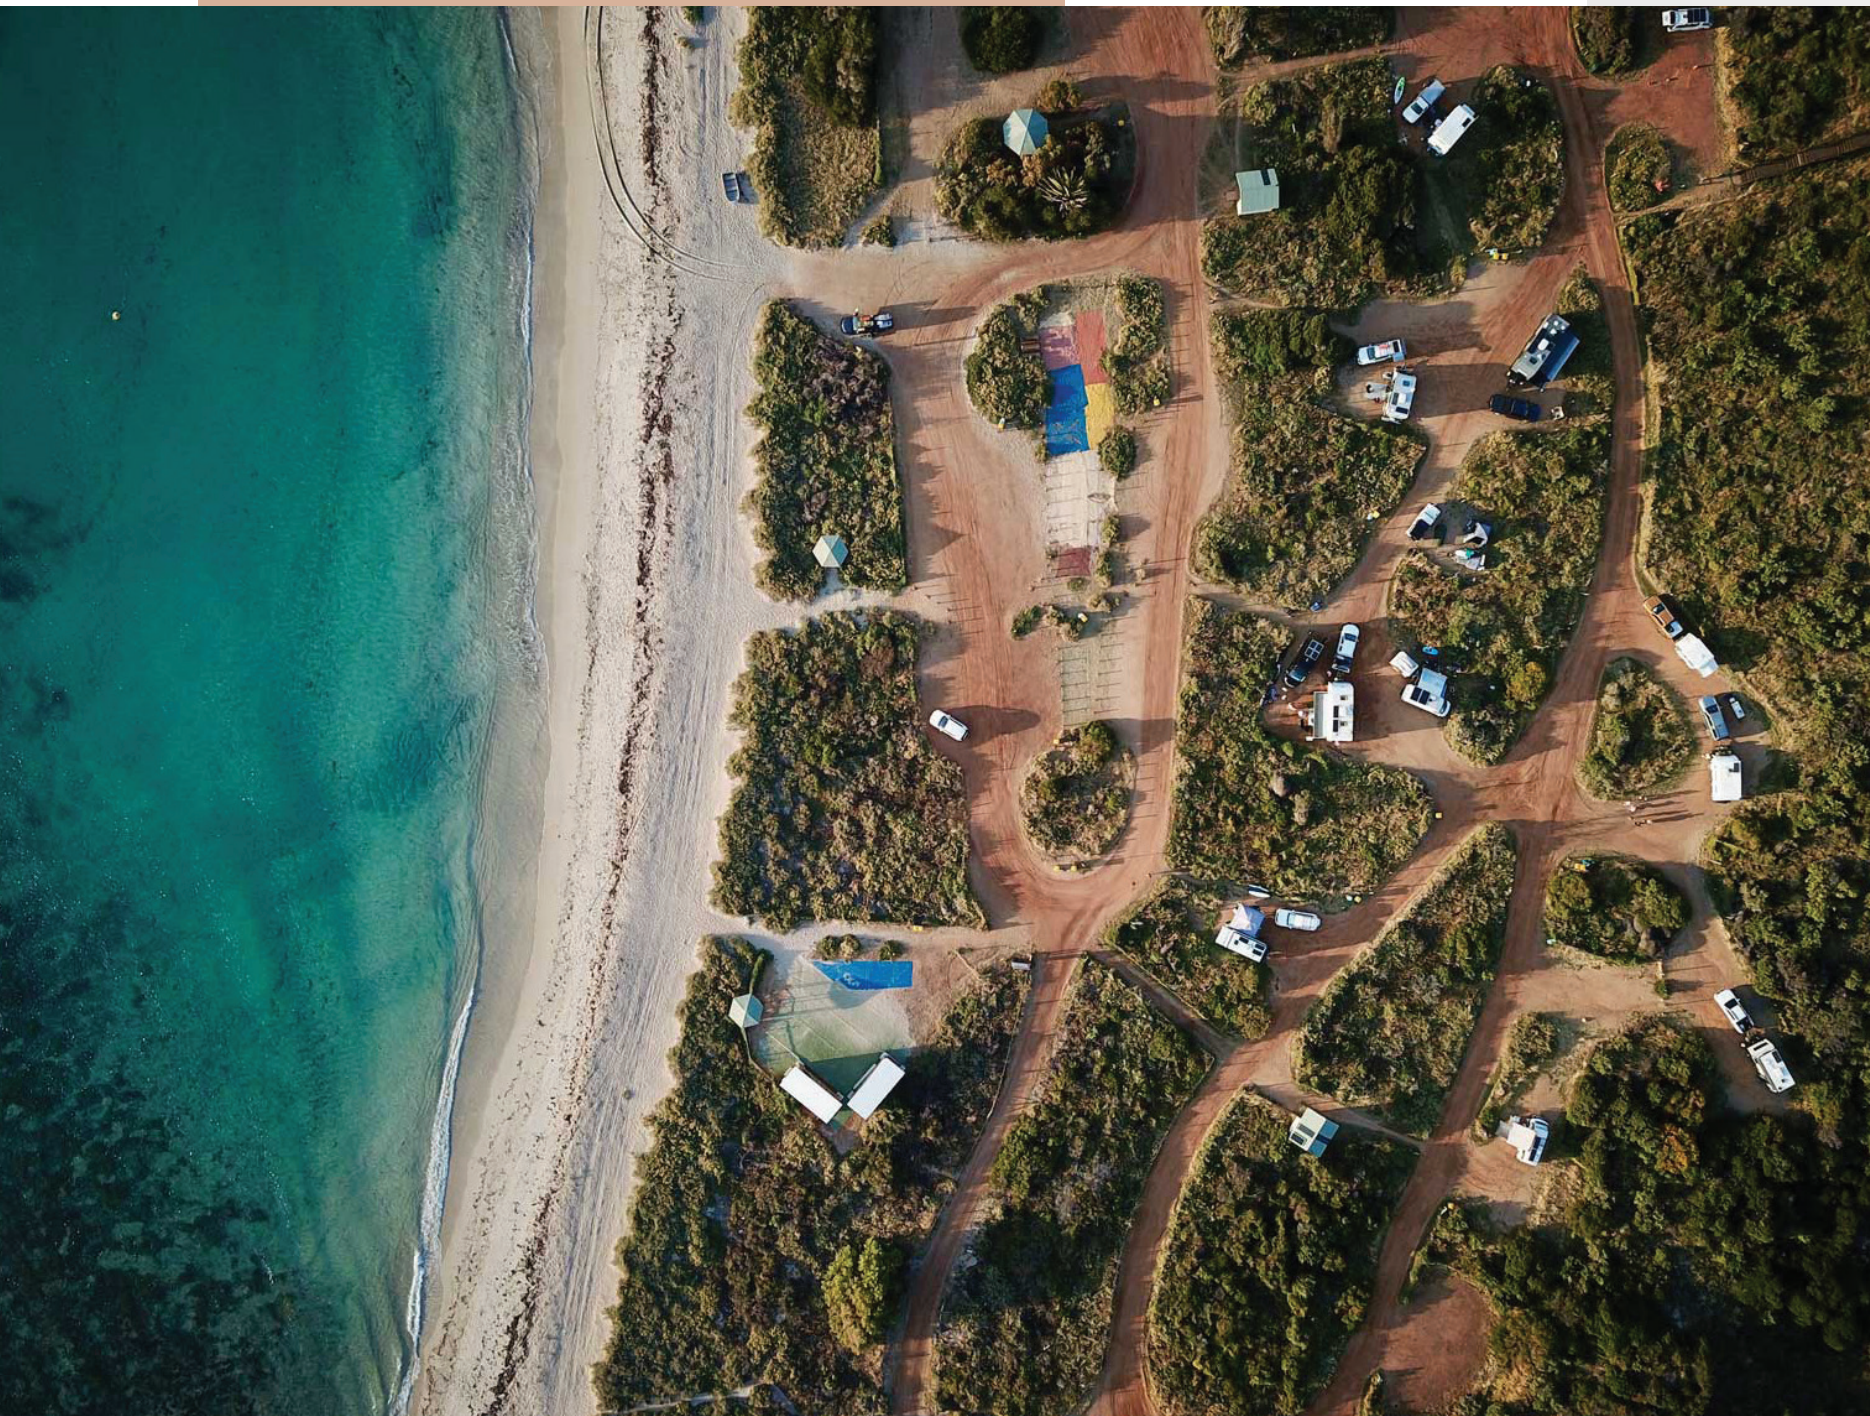

02. CASA Certified

As a CASA-certified drone operator, we adhere strictly to all applicable regulations and safety standards in Western Australia, ensuring safe and legal flights for every project. We prioritise both safety and quality, making sure all aerial operations comply with local rules, including airspace restrictions and no-fly zones.

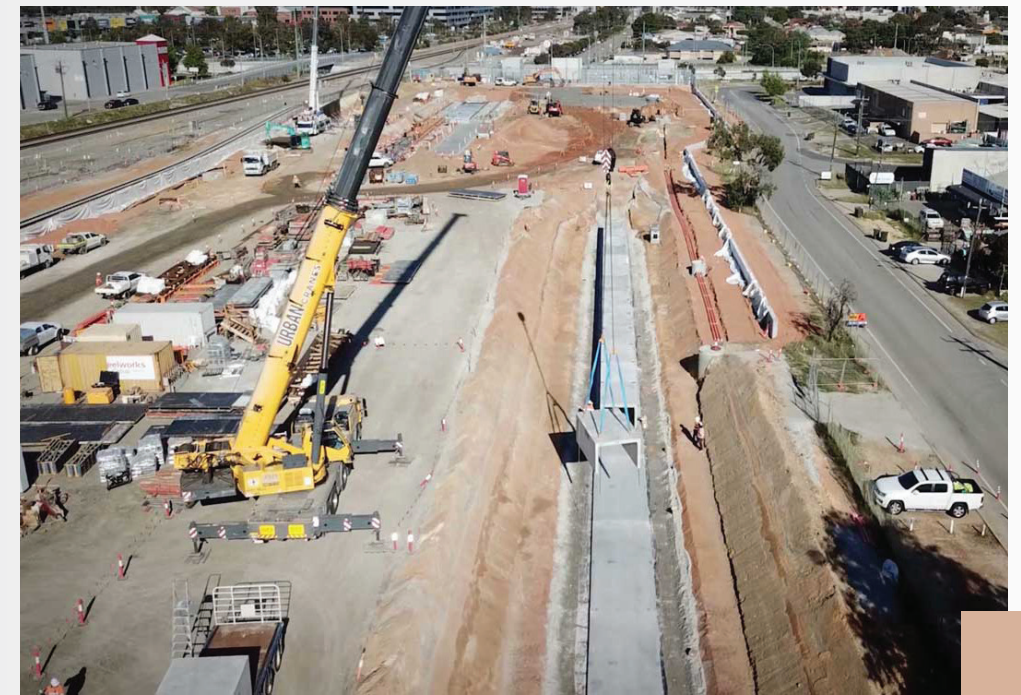

03. Delivery

Once captured, we deliver footage and photos in the highest possible resolution, ensuring every detail is preserved. Our editing process involves advanced techniques using Adobe Premiere Pro for video and Adobe Lightroom for photo enhancements, providing polished, professional results that meet the highest standards.

04. Perfection

Whether you're looking for cinematic video, vibrant photos, or a custom edit, we ensure the final product is tailored to your vision and delivered with precision and care.
